SUMMARY

Software Developer with 6+ years of experience building scalable systems across social media, healthtech, climate tech, and software consulting. Proven impact on critical services at Reddit, saving \$4.5M annually. Experienced in cloud infrastructure, microservices, and AI-driven engineering productivity.

PROFESSIONAL EXPERIENCE

REDDIT

Remote | San Francisco, US
2025-Present

Software Developer

- Co-led an initiative that taught developers to use AI to accelerate the Reddit rewrite from Python to Go, cutting some timelines by half.
- Refactored and rewrote code from Python to Golang, halving latency and increasing server efficiency by $\approx 15\times$ (from 11 to 160 RPS/core), saving around 4.5 million dollars per year in infrastructure costs.
- Monitored deploys through tap compare, shadow traffic, and rolling release techniques with feature flags using Grafana, ensuring fewer regressions and reliable software.
- Built and maintained documentation and process guides to prevent knowledge silos and drive consistency across the team.

SWORD HEALTH

Remote | Porto, Portugal
2024-2025

Software Developer

- Developed and maintained scalable, high-performance microservices, powering a web platform and mobile app with 100K+ downloads.
- Leveraged Google Cloud Functions and Pub/Sub to develop RESTful and gRPC APIs, optimizing service reliability and enhancing fault tolerance.
- Achieved high test coverage in Sword's APIs through Test-Driven Development (TDD), creating unit and integration tests to reduce bugs and improve backend reliability.
- Enhanced overall code quality and eliminated recurring bugs by conducting code reviews and integrating automated code analysis and linting tools into our CI/CD pipeline.

MOSS EARTH

Remote | Montevideo, Uruguay
2023-2024

Software Developer

- Optimized API for 1M+ daily requests (from partners like iFood & Gol) using caching, database indexing, materialized views, and SQL tuning, cutting costs by around 20% and boosting speed.
- Integrated external APIs from Pipefy, Linte, HubSpot, Slack, Google Docs, Google Sheets, and OpenAI, automating workflows and reducing weekly work hours across multiple departments.
- Implemented monitoring tools such as New Relic, Sentry, and OpenTelemetry, identifying critical system bottlenecks and reducing operational costs.

FLOW LAB

Hybrid | Uberlândia, Brazil
2020-2023

Software Developer

- Led customer meetings with professionals across sectors, including doctors, managers, engineers, and agronomists, understanding their challenges and delivering tailored solutions.
- Managed Agile-driven projects, ensuring on-time, within-budget deliveries, achieving high client satisfaction.

EDUCATION

Universidade Federal de São Paulo (USP)
MBA in Software Engineering

São Paulo, SP - Brazil
2026-2027

Estácio de Sá
Bachelor's Degree in Computer Science

Uberlândia, MG - Brazil
2021-2025

SKILLS

- Technologies:** Go (Golang), Python, PHP, TypeScript, JavaScript, Node.js, RESTful API, GraphQL, gRPC, WebSockets, Postgres, MySQL, BigQuery, Redis, MongoDB, AWS, Google Cloud (GCP), Grafana, New Relic, Pub/Sub, Git, Docker, Kubernetes, Terraform, Nginx, Linux, React, Next.js, HTML, CSS.
- Technical Skills:** Microservices, MVC and Hexagonal Architectures, Design patterns,DDD, TDD, Version control, CI/CD, Data structures, Algorithms, Clean code, Unit, Snapshot, and Integration tests.
- Languages:** Fluent in Portuguese (native speaker) and English; intermediate proficiency in Spanish.
